That Winter Pamela Gillilan,1986 Pamela Gillilan was born in London in 1918, married in 1948 and moved to Cornwall in 1951. When she sat down to write her poem Come Away after the death of her husband David, she had written no poems for a quarter of a century. Then came a sequence of incredibly moving elegies. Other poems followed, and two years after starting to write again, she won the Cheltenham Festival poetry competition. Her first collection That Winter (Bloodaxe, 1986) was shortlisted for the Commonwealth Poetry Prize.

Organelle Proteomics Delphine Pflieger,Jean Rossier,2010-11-19 This is the first book to examine organelle proteomics in depth. It begins by introducing the different analytical strategies developed and successfully utilized to study organelle proteomes, and detailing the use of multidimensional liquid chromatography coupled to tandem mass spectrometry for peptide sample analysis. Detailed protocols are provided and a section is devoted to methods enabling a global estimate of the reliability of the protein list assigned to an organelle.

Principles of Computer Architecture Miles Murdocca,Vincent P. Heuring,2000 This piece covers computer architecture at the instruction set architecture (ISA) and system design levels. Starting with foundation material on data representation and computer arithmetic, the book moves through the basic components of a computer architecture, covering topics at increasing levels of complexity up through CISC, network architecture, and parallel architecture. The authors have adopted the use of a SPARC-subset for an instructional ISA called ARC (A RISC Computer), which is carried through the mainstream of the book, and is complemented with platform-independent software tools that simulate the ARC ISA as well as the MIPS and x86 (Pentium) ISAs. FEATURES/BENEFITS Choice of the instruction set architecture (ISA). The mainstream ISA ARC is a subset of the commercial SPARC, which strikes a balance between the complexity of a real-world architecture and the need for a simple instructional ISA. Companion Website <http://www.prenhall.com/murdocca> Software available on

Companion Website. Assembles and simulates program execution on SPARC-subset (ARC), MIPS, and Intel ISAs. Simulators and assemblers run on PCs, Macs, and Unix. Over 400 Adobe Acrobat slides Simplify lecture preparation. Password-protected area of Companion Website. Case studies. Over 200 homework problems. The major portion of the text deals with a high level look at computer architecture, while the appendices and case studies cover lower level, technology-dependent aspects. Allows computer architecture to be studied at all levels.

Language in the Digital Era. Challenges and Perspectives Daniel DeJica, Gyde Hansen, Peter Sandrini, Iulia Para, 2016-06-20 This collected volume brings together the contributions of several humanities scholars who focus on the evolution of language in the digital era. The first part of the volume explores general aspects of humanities and linguistics in the digital environment. The second part focuses on language and translation and includes topics that discuss the digital translation policy, new technologies and specialised translation, online resources for terminology management, translation of online advertising, or subtitling. The last part of the book focuses on language teaching and learning and addresses the changes, challenges and perspectives of didactics in the age of technology. Each contribution is divided into several sections that present the state of the art and the methodology used, and discuss the results and perspectives of the authors. The book is recommended to scholars, professionals, students and anyone interested in the changes within the humanities in conjunction with technological innovation or in the ways language is adapting to the challenges of today's digitized world.

Moon-face and Other Stories Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Precalculus James Stewart, L. Redlin, Saleem Watson, 2002 In this best selling Precalculus text, the authors explain concepts simply and clearly, without glossing over difficult points. This comprehensive, evenly-paced book provides complete coverage of the function concept and integrates substantial graphing calculator materials that help students develop insight

into mathematical ideas. This author team invests the same attention to detail and clarity as Jim Stewart does in his market-leading Calculus text.

Kubrick's Men Richard Rambuss,2021-03-02 A provocative re-reading of Stanley Kubrick's work and its focus on masculine desire The work of Stanley Kubrick amounts to a sustained reflection on the male condition: past, present, and future. The persistent theme of his filmmaking is less violence or sex than it is the pressurized exertion of masculinity in unusual or extreme circumstances, where it may be taxed or exaggerated to various effects, tragic and comic—or metamorphosed, distorted, and even undone. The stories that Kubrick's movies tell range from global nuclear politics to the unpredictable sexual dynamics of a marriage; from a day in the life of a New York City prizefighter preparing for a nighttime bout to the evolution of humankind. These male melodramas center on sociality and asociality. They feature male doubles, pairs, and rivals. They explore the romance of men and their machines, and men as machines. They figure intensely conflicted forms of male sexual desire. And they are also very much about male manners, style, taste, and art. Examining the formal, thematic, and theoretical affiliations between Kubrick's three bodies of work—his photographs, his documentaries, and his feature films—Kubrick's Men offers new vantages on to the question of gender and sexuality, including the first extended treatment of homosexuality in Kubrick's male-oriented work.

Plasma in Cancer Treatment Annemie Bogaerts,Angela Privat-Maldonado,2021-05-31 In the last decade, research on cold atmospheric plasma (CAP) has significantly advanced our understanding of the effect of CAP on cancer cells and their potential for cancer treatment. This effect is due to the reactive oxygen and nitrogen species (RONS) created by plasma. This has been demonstrated for different cancer cell lines and the first clinical trials showed promising results. In addition, plasma could be combined with other treatments-such as immunotherapy-to boost its anticancer activity. The addition of new research tools to study the response of cancer cells to CAP-such as 3D in vitro, in ovo, and in vivo models and in silico approaches-as well as the use of -OMICS technologies could aid in unravelling the underlying mechanisms of CAP in cancer treatment. In order to progress towards widespread clinical application of CAP, an integrated study of the multidimensional effect of CAP in cancer treatment is essential. In this book, reviews and original research papers are published that provide new insights into the mechanisms of cold atmospheric plasma in cancer treatment, based on in vitro and in vivo experiments, clinical studies, as well as computer modeling.

The Sixth Station Linda Stasi,2013-12-01 Some say Demiel ben Yusef is the world's most dangerous terrorist, personally responsible for bombings and riots that have claimed the lives of thousands. Others insist he is a man of peace, a miracle worker, and possibly even the Son of God. His trial in New York City for crimes against humanity attracts scores of protestors, as well as media and religious leaders from around the world. Cynical reporter Alessandra Russo heads to the UN hoping for a piece of the action, but soon becomes entangled in controversy and suspicion when ben Yusef singles her out for attention among all other reporters. As Alessandra begins digging into ben Yusef's past, she is already in more danger than she knows—and when she is falsely accused of murder during her investigation, she is forced to flee New York. On the run from unknown enemies, Alessandra finds herself on the trail of a global conspiracy and a story that could shake the world to its foundations. Is Demiel ben Yusef the Second Coming or the Antichrist? The truth may lie in the secret history of the Holy Family, a group of Templars who defied the church, and a mysterious relic stained with the sacred blood of Christ Himself.
