**Orchid Biology: Reviews and Perspectives X** Tiiu Kull, J. Arditti, Sek Man Wong, 2009-01-21 As stated many times before the purpose of Orchid Biology, Reviews and Perspectives (OB) is to present reviews on all aspects of orchids. The aim is not to balance every volume, but to make a balanced and wide ranging presentation of orchids in the series as a whole. The chapters in this, the last volume of the series, range over a number of topics which were not covered before. Singapore is justly famed for its orchids. They can be seen on arrival (or departure) in its modern, highly efficient and comfortable Changi Airport and on the way from it to town. Vanda Miss Joaquim, the first hybrid to come from Singapore became its National Flower. This natural hybrid can be seen on its currency, stamps, and public and private decorations. Many excellent breeders, starting with Prof. Eric Holttum who bred the first man made hybrid (*Spathoglottis Primrose*), produced numerous magnificent hybrids and won countless awards in Singapore and elsewhere. These hybrids served to enrich the country's orchid mystique. In the opening chapter of this volume Dr. Teoh Eng Soon (Western style: Eng Soon Teoh), himself a prize winning orchid breeder, grower and author writes about some of the breeders who contributed to the Singapore orchid fame. Prof. Hans Fitting was one of the best known plant physiologists of his time. As a young man he studied the effects of pollen on orchid flowers.

**Project Life Cycle Economics** Massimo Pica,2016-03-03 The financing of modern construction projects reflects the need to address the costs and benefits of the whole life of the project. This means that end of life economics can now have a far greater impact on the planning and feasibility phases. During the project itself, decisions on construction materials and processes all influence the schedule as well as both immediate and down-the-line costs. Massimo Pica and his co-authors explain in detail the fundamentals of project life cycle economics and how they apply in the context of complex modern construction. This is an essential guide for those involved in construction project design, tendering and contracting; to help ensure the sustainability of the project or their contribution to it, from the start. It is also important for those involved in the delivery of the project to help them make the choices to keep the project on a financial even keel. Government, corporations and other organizations are looking for new models of collaborative working to fund their large construction and infrastructure projects in the face of changing attitudes to risk; a better educated and more demanding base of end-user clients and the increasing requirements for projects that are environmentally responsible and sustainable. Project Life Cycle Economics is a fundamental primer for those commissioning and those delivering construction.

**There is no Map in Hell** Steve Birkinshaw,2017-05-01 In 1986, the legendary fell runner Joss Naylor completed a continuous circuit of all 214 Wainwright fells in the Lake District, covering a staggering distance of over 300 miles - plus many thousands of metres of ascent - in only seven days and one hour. Those in the know thought that this record would never be beaten. It is the ultimate British ultramarathon. The person taking on this superhuman challenge would have to be willing to push harder and suffer more than ever before. There is no Map in Hell tells the story of a man willing to do just that. In 2014, Steve Birkinshaw made an attempt at setting a new record. With a background of nearly forty years of running

elite orienteering races and extreme-distance fell running over the toughest terrain, if he couldn't do it, surely no one could. But the Wainwrights challenge is in a different league: aspirants need to complete two marathons and over 5,000 metres of ascent every day for a week. With a foreword by Joss Naylor, *There is no Map in Hell* recounts Birkinshaw's preparation, training and mile-by-mile experience of the extraordinary and sometimes hellish demands he made of his mind and body, and the physiological aftermath of such a feat. His deep love of the fells, phenomenal strength and tenacity are awe inspiring, and testimony to athletes and onlookers alike that 'in order to attain the impossible, one must attempt the absurd'.
